

We have updated the site to Joomla 1.5

Posted by Thenor - 2009/05/27 00:18

To fix many bugs that were plaguing the site we decided it was prudent to update the site. We were down for a few days while we got the Search engine friendly URL's all worked out. Luckily we have an amazing Web developer, who has donated his time to make the site amazing.

If you know any one needing web work done let him know.
www.Trevorbice.com

We are still looking for all the problems but we have fixed most of them. If you find an error, please post it in the forum and we will get to it as soon as possible.

We have published a new article and blog take a look at them.

We are also looking for writers. if you feel you have the stuff to be a writer let us know in the forum

If you find a bug, be sure to report it to an admin in some fashion. You can report them here, or you can just e-mail me at trevorbice@yahoo.com. The sooner they get reported, the sooner they can get tracked down and fixed. Try to be as specific as possible if you are trying to describe the situation where you encountered the error.

Social Bookmarking links are now functioning

Posted by crossfire - 2009/05/29 18:00

This post is just to let anyone who cares know that the social bookmarking feature on our articles and blogs is now functioning. If anyone finds any further errors with it, be sure to tell me.
