

Natural Playscape

Posted by marilyn934 - 2010/06/21 21:16

Friends of McKinney Falls is trying to get a new natural playscape for the park, but local ideas/resources seem limited. Can anyone offer ideas or assistance? It doesn't seem right to bring people all the way from Massachusetts for something we should hopefully be able to do locally...

not much information...just that we want natural materials and design and that the kids should be able to be active and have fun on it...
the design may cost as much as the materials :(

Hi Marilyn:

We love to explore new applications for natural building, and a playscape sounds amazing! Potentially, we could organize a workshop around its construction, to get the community directly involved.

My email is fearlessrevolutionary@gmail.com, I can bring up your project at the next board meeting. Email me your requirements, parameters (if any), pictures of the site, budget, and timeframe and we'll see what we can do. Thanks so much!
