

## Land possibility

---

There is a very nice land possibility about 30 minuets from Bellingham. look at the blog for more info. It has a 150' waterfall. it is gorgeous, while maintaining its ability to be useful starting point. We will need 300,000, which will probably have to come from a loan unless we find a large donation. We can probably scrape enough together for a down payment, but it will be difficult to find enough to pay the mortgage for the first 6 months. after the first 6 months I think we will have something in place to generate income.

IDEAS?

---

We have decided to go Ahead and start the process after a lot of planing, redesigning and thoughtful discussion. We have devised a way to make this all work out.

Phase 1 a sustainable lumber operation

Phase 2 A sustainability retreat

Phase 3 A fully self sufficient Sustainable humanity research facility
